Alfa Collection

The Alfa Coffee Table Set, inspired by the clean, clear, and strong lines of modern architecture, creates a dynamic installation in the center of your living room with its interlocking (nesting) hierarchical structure. Completely leaving behind monotonous and cumbersome coffee table designs, this design stands out with the perfect geometric harmony of modules of varying heights and sizes. Blending the noble texture of wood seamlessly with smoked/bronze tempered glass tabletops, the model adds infinite depth and spaciousness to the room thanks to its linear metal leg architecture in brushed anthracite or champagne tones.
